Kristin Dean

to me

Hi Sharon,

The engineers will be at the meeting to discuss the studies of the landfill that have been conducted and to discuss plans for protecting and improving Ralston Creek. The aesthetics of the site from the RV storage will be discussed but more so at the larger group meeting. We are trying to address concerns regarding the environmental conditions of the site at the small group meet vs. going into details around the aesthetics, but we can certainly discuss aesthetics as well.

Hope that helps.

Kristin Dean

to me, Karen

Hi Sharon,

I'll have a site plan to share. Until the engineering and environmental documents are submitted under a formal application, we will not be presenting them to the public. Our experts will be on site to discuss findings, etc. and answer questions. This is Step #1 in re-engaging the public and we will have other opportunities to share information and hear from you all.

Best Regards,

Kristin Dean, AICP
